

JMT provide excellent Japanese tools necessary for manufacturing.

Our Services

Manufacturing tools

We specialize in the sale of high-quality Japanese-made cutting tools and industrial equipment for the manufacturing industry. We offer a wide range of products, including end mills, sensors, valves, and more

Export & Import

We have extensive experience in conducting export and import business, including transactions with overseas companies. With our dedicated team of bilingual staff, we ensure smooth communication throughout the process.

Professional support

Since 1948, we have been supporting Japan's manufacturing industry. We are capable of supplying hard-to-find Japanese products and repair parts. We provide prompt quotations for your convenience.

Featured products

Leak Inspection Materials

These Leak Inspection Materials Series shall be used for Oil, Water and Gas leak detection inspection in petrochemical Plants, Tanks, Boiler, Piping system, Oil lubrication systems and transformer etc. Easily and safety leak detection inspection shall be available.

Spot welding inserts

We can create tip insert to your specific needs, from standard products to custom-made options. If you wish to have a custom tip made, please provide us with the product drawings. We also offer sales in small quantities. So please feel free to contact us for any inquiries.

Cutters for Tip Dresser

We will manufacture the cutters for the tip dresser. Please provide us with the desired size. We also sell tip dresser main units.
